

## Appendix B – Village Green/Cockhaven Road Junction Hedge

2011

2018

Sorry, haven't yet taken an up-to-date photo, hopefully will by Tuesday evening! But this gives you a general ideal of where I mean.

The original intention of the hedge was to stop children running/cycling down the bank and ending up in the road.

Perhaps replace it with a small tree (set further in surrounded by wildflowers and bird stations. I know the couple who live next door would love this as they often talk to me about the birds who use the boundary hedge.

Another project idea, mentioned to me in the past, (but it's larger in scale) is to remove the humped land at the end, either by reducing the gradient or levelling it, and create a footway along the edge of the Village Green inside the bollards, all the way to Horns Park (corner opposite the school).
